ESG - SOCIAL

As of 21/09/2026

Group 2 – Member – YCS, LTH, MZ, Raylen, Hun

3.2 Group 2 reported the following progress of the action plans.

a) Social

i) Driver Training on weight regulations and proper loading procedures

- Collaboration with logistics suppliers to avoid congestion period for delivery and/or combine delivery, to maximise delivery per trip

~~➢ Collaboration with suppliers, sometimes hard because some materials delivered from outstation, they are hard to avoid the timing, plus the highway time restriction~~

~~➢ not applicable due to a lot of suppliers, but for damayan they create d a calendar because of site congestion~~

- Awareness on shortened unloading times at construction sites to improve logistics Efficiency

~~➢ Priority basis & wait for 15mins if no site team attend, call purchaser~~

- Regular health screening for drivers and vehicle maintenance (covered under preventive maintenance)

------ To propose to HR every year (now we have 6 full time drivers +1 adhoc --- HR already noted and will include in planning

~~▪ Use of speed limit devices in lorries and trailers.~~

~~➢ - speed limit device is a must now in renewal of lorry permit~~

ii) Proposed enhancing CSR through donations to schools, annual donations should be included in ESG reporting.

iii) Proposed to launch a formal ESG recycling awareness drive

- Define maximum reuse/recycling cycles

➢ Floor Gard – 3 times (last suppose to use at carpark)

➢ 7-ply WBP plywood – 3 to 4 times

➢ 5-ply single sided tego film plywood – 4 to 5 times

------ Still collecting more data (sample of table attached next slide)

~~▪ -- Focus on concrete waste reduction as excess concrete from slump tests and cube sampling identified as a key waste source.~~

~~▪ - Suggested to mass production of reusable concrete items instead of disposal~~

iii) Proposed to launch a formal ESG recycling awareness drive

Define maximum reuse/recycling cycles

Summary of Recyclable Materials				
Item No.	**Description**	**Recycle time**	**Recycling Purpose**	**Disposal Method**
1	WBP (Weather and Boil Proof) Plywood - 7ply	3-4 times	Formwork	
2	Tego Plywood - 5 ply	4-5 times	Formwork	
3	Floor gard protection	3 times (last at carpark)	Protection	
4	Excess Concrete	-	Road barrier , Spacer block, PC slab	
5	Corner Bead (small pieces)	-	Protection angle at tile drop to prevent chipping and damage.	
6	Reuse Damaged Scaffold		Fabricate filing racks, storage racks and other items. (workers quarters bed frame, cabinet)	

New Proposal # 01:

i) **To seriously look into it on the Up-skilling and Re-skilling our Workers/Staffs**

- **Train our workers as lifting supervisors**
- **Train our staff to SHO/ SSS**
- **Train our staff as QLASSIC Assessors**
- **Train our Engineers on MS project**

Feature	Upskilling 🚀	Reskilling 🔄
Core Objective	**Enhance and advance** current capabilities.	**Learn entirely new skills** for a career pivot.
Job Impact	The worker stays in the **same job** but performs at a higher, more technical, or efficient level.	The worker transitions into a **completely different job** within or outside the company.

Worker vs. Supervisor Training Scenarios

Personnel Level	Upskilling Scenario 🚀 *(Advancing in the same path)*	Reskilling Scenario 🔄 *(Pivoting to a new role)*
Site Worker *(General Labor / Tradesmen)*	**Scenario:** A general bricklaying or tiling worker is trained on advanced architectural finishing standards to meet strict **QLASSIC** criteria. **The Result:** They stay a worker but can now execute high-precision, zero-defect installation methods on-site, directly lowering the project's non-conformance rate.	**Scenario:** A manual mixing or material handling worker whose physical role is being replaced by on-site automated systems is trained in specialized equipment maintenance. **The Result:** They pivot completely from general labor to becoming a certified on-site **Equipment Operator** or mechanical tools technician.

ESG Alignment	Addresses **Workforce Development** and efficiency by minimizing internal skills gaps.	Addresses **Just Transition** and labor protection by preventing layoffs during structural or technological shifts.

Staff Up-skilling & Re-skilling Monitoring Matrix (Sample)

No.	Staff Name	Department	Position	Training Required	Status	Training Date	Expiry / Renewal	Remarks
1	Raylen	QAQC	QAQC Manager	QLASSIC Assessor	✅ Completed	15 Mar 2026	15 Mar 2029	Certified Assessor
2	Narissa	QAQC	Senior QAQC Engineer	QLASSIC Assessor	🟡 Planned	Oct 2026	-	Pending registration
3	Ahmad	Site	Site Engineer	MS Project	🔄 In Progress	20 Sep 2026	N/A	Internal training
4	Arif	Safety	Safety Supervisor	SHO	🟡 Planned	Nov 2026	-	DOSH certification
5	Kumar	Construction	Foreman/Kepala	Lifting Supervisor	✅ Completed	05 Aug 2026	05 Aug 2028	CIDB Certified

New Proposal # 02:

ii) To organize Community & CSR Programme - School outreach, blood donation, charity drives, environmental clean-up, construction safety awareness, and local community support.

- **Suggested Annual CSR Calendar**

Quarter	CSR Activity
Q1	Blood Donation Campaign.
Q2	School Career Talk – Construction Industry.
Q3	Community Clean-Up & Tree Planting.
Q4	Charity & Festive Community Support Programme.

- **New Proposal # 03:**

- **iii) To create more awareness on Health & Wellbeing Programme - Health screening, mental wellness talks, fitness activities, ergonomic awareness, and employee assistance initiatives.**

ESG Social Initiative	Health & Wellbeing Programme
Health Screening	Annual medical check-up, blood pressure and glucose screening, BMI assessment, vision and hearing tests.
Mental Wellness	Stress management talks, mental health awareness programmes, counselling support, and work-life balance workshops.
Fitness & Active Lifestyle	Sports day, fitness challenges, recreational activities, walking/cycling programmes, and team sports events.
Ergonomic Awareness	Ergonomic assessments, proper lifting techniques, stretching exercises, and injury prevention training for office and site personnel.
Employee Assistance	Financial wellness seminars, family support initiatives, emergency assistance programmes, and employee feedback channels.

Monitoring Frequency	Quarterly review and annual reporting under ESG and IMS performance review.
