
Sime Darby Property
SIME DARBY PROPERTY PRESENTS
Township of Tomorrow
An innovation initiative by Sime Darby Property to transform blueprints into reality.
Sime Darby Property is seeking university talent to shape the next generation of smart townships.
Challenge Briefing · 9 October 2026 · 6:30 P.M. · Microsoft Teams
Your ideas could help shape how people live tomorrow.

UNIVERSITY HACKATHON 2026

Message from Group Managing Director & Chief Executive Officer

VIDEO MESSAGE

Dato’ Seri Azmir Merican

Group Managing Director & Chief Executive Officer

Sime Darby Property

Watch the Opening Message

Dato’ Seri Azmir Merican shares why Sime Darby Property is inviting university students to help shape the future of township living.

Meet Sime Darby Property

Our Story

Dr Lam Su Ki
Head, Innovation & Partnership
Sime Darby Property

Our Purpose, Vision, Mission and Core Values

Our Purpose

Driving Real Estate as a **Value Multiplier** for People, Businesses, Economies & the Planet.

Our Vision

Advancing real estate as
a force for collective progress,
in harmony with the planet's resources.

Our Mission

To develop, own and manage
a thriving asset portfolio,
creating value for all stakeholders.

Our Values

- **T** Together we do what's right
- **E** We lead with Excellence
- **A** We embrace new Approaches
- **M** We Make things happen

Shaping Malaysia's Urban Landscape for Over Five Decades

Sime Darby Property is a real estate company recognised for township excellence, sustainability and a trusted developer with scale, stability and a long-term commitment to nation and community building.

Listed on
Main Market of Bursa Malaysia

RM10bil
Market capitalisation

One of the largest property developers with landbank of

~11,400 acres

translating to GDV of over ~RM105bil

University Hackathon 2026

UNIVERSITY HACKATHON 2026

Message from Chief Digital & Technology Officer

VIDEO MESSAGE

Elmen Tan

Chief Digital & Technology Officer

Sime Darby Property

Watch the Opening Message

Elmen Tan, Chief Digital & Technology Officer, shares why Sime Darby Property is inviting university students to help shape the future of township living.

UNIVERSITY HACKATHON 2026

Why Township of Tomorrow?

We build homes. But a home is only the beginning of a life.

Families move into our townships and live there for decades. We asked ourselves a simple question: how do we help them keep living sustainably long after the keys are handed over?

That is where we challenge ourselves — to multiply the value of a township even after we have fulfilled our responsibility as a developer.

Now we are sharing that challenge with you.

Imagine the township of tomorrow — and help us build it.

This is not just about buildings. It is about how people live.

UNIVERSITY HACKATHON 2026

HOW MIGHT WE REIMAGINE THE TOWNSHIP OF TOMORROW?

PEOPLE

How might we enable every resident to live healthier, safer, more connected and more fulfilling lives.

PLANET

How might we create townships that regenerate the environment while making sustainable living effortless for communities, residents and businesses?

CHOOSE ONE FOCUS AREA

UNIVERSITY HACKATHON 2026

Challenge Theme 1 - PEOPLE

How might we enable every resident to live healthier, safer, more connected and more fulfilling lives?

Community Wellbeing

Physical and mental health of residents

Safety & Security

Safer environments for all residents

Accessibility & Inclusion

Designing for everyone

Mobility

Getting around the township

Digital Living

Connected, tech-enabled lifestyles

Neighbourhood Connection

Stronger community bonds

Healthy Lifestyles

Active, balanced living

You do not need to solve everything. Find ONE meaningful problem and solve it well.

UNIVERSITY HACKATHON 2026

PEOPLE: problems and ideas

A PEOPLE problem is a difficulty residents face in daily life. The solution is what should improve their experience.

PROBLEM TO SOLVE	POTENTIAL SOLUTION
Finding parking at a mall Shoppers circle crowded parking levels looking for a vacant bay, wasting time and adding stress to their visit.	**Prebooked Parking APP** Guide drivers to zones with pre-booked free bays. Prototype a parking map using simulated occupancy data. *Test: less time spent finding a parking bay.*
Getting help for public assets Residents waste time chasing updates because they do not know whom to contact or how to track an issue.	**One reporting channel** One resident hub for services, shopping, retails, bookings, requests and updates — turning scattered touchpoints into a single experience. *Test: fewer follow-ups and faster resolution.*
Missed deliveries and parcel collection Residents miss deliveries while at work or waste time finding parcels left at a shared collection point.	**Secure parcel collection** Log parcels at a secure collection point, notify residents of the location and issue a one-time collection code. *Test: faster retrieval and fewer collection errors.*

Who faces the problem? How often? What would improve if you solved it?

Illustrative examples only. Validate the problem with residents before developing your solution.

UNIVERSITY HACKATHON 2026

Challenge Theme 2 - PLANET

How might we create townships that regenerate the environment and make sustainable living effortless?

Waste Management

Reducing and managing waste effectively

Circular Economy

Closing resource loops

Energy Efficiency

Smarter energy use across the township

Water Conservation

Protecting and managing water resources

Green Transport

Low-carbon mobility solutions

Biodiversity

Protecting and restoring natural ecosystems

Climate Resilience

Adapting to climate change impacts

Think beyond awareness. How could your solution change behaviour, systems or outcomes?

UNIVERSITY HACKATHON 2026

PLANET: problems and ideas

A PLANET problem involves waste or environmental harm. The solution should make sustainable living easier.

PROBLEM TO SOLVE	POTENTIAL SOLUTION
Confusion about recycling Residents are unsure what collectors accept or where to take items, so recyclables enter general waste.	**Local recycling guide and collection** Check accepted items and book local collections. Prototype a sorting guide and booking journey. *Test: more material accepted for recycling.*
Choosing the right sites for solar Developers need to prioritise rooftops and car parks for detailed solar feasibility studies.	**Solar opportunity mapper** Rank sites by usable area, shading and electricity demand. Flag missing data and engineering checks. *Test: shortlist quality against expert assessments.*
Comparing greener building materials Project teams struggle to compare environmental claims alongside cost, durability and specifications.	**Material comparison AI Assistant Agent** Compare materials for one use with equivalent performance requirements. Flag missing environmental evidence. *Test: comparison accuracy and time to shortlist.*
Proving waste-derived materials work A recycled-content product needs evidence of suitable performance and lower environmental impact.	**Non-structural material prototype** Develop a landscape edging sample and a test plan. Check safety, performance and environmental impact. *Test: results against a conventional alternative.*

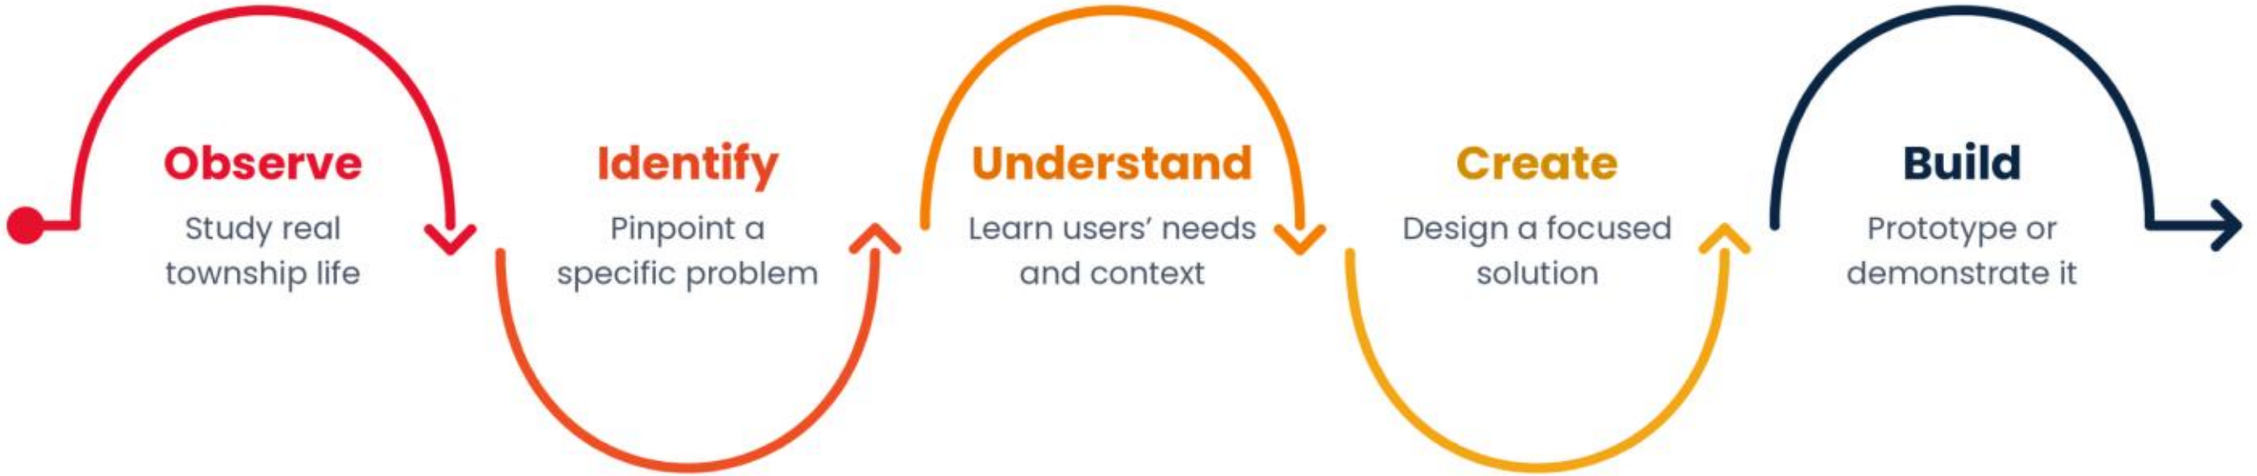

What is being harmful to PLANET? Why? How would you measure the environmental improvement?

Illustrative examples only. Validate the problem with residents and operators before developing your solution.

UNIVERSITY HACKATHON 2026

From a Big Challenge to a Great Idea

Do not try to redesign an entire township. Solve a specific problem that matters. Follow this structured approach to develop a compelling, evidence-based solution.

Each step builds on the last. Teams that follow this process produce stronger, more credible and more impactful solutions.

UNIVERSITY HACKATHON 2026

What Makes a Strong Solution?

RELEVANT

Addresses a real People or Planet challenge within a township context.

IMPACTFUL

Creates meaningful and measurable outcomes for residents or the environment.

INNOVATIVE

Offers something meaningfully different and not simply repackaging an existing solution.

FEASIBLE

Can realistically be piloted and implemented within a township environment.

SCALABLE

Has potential beyond one location or use case. Can grow across SDP townships.

EVIDENCE BASED

Supported by research, user validation, a prototype or a working demonstration.

Judges will assess every submission against six core dimensions. Strong solutions score well across all six and not just one or two.

The Journey Begins…

Shahidah Salam (Dina)
Manager, Innovation & Partnership
Sime Darby Property

UNIVERSITY HACKATHON 2026

Your Hackathon Journey

Key milestones from briefing to Final Presentation & Award Ceremony.

THE TWO CRITICAL DEADLINES

21 October: Registration closes | 23 October: Proposal submission

UNIVERSITY HACKATHON 2026

Submission Deadline

ALL teams must submit the following four components by **11:59 P.M., 23 October 2026.**

Incomplete submissions will not be considered.

Pitch Deck

REQUIRED

Maximum 10 main slides. Appendix allowed for supporting details.

Video / Demo Link

REQUIRED

Mandatory. A 5-minute video or live demo link demonstrating your solution.

Prototype / Code

REQUIRED

Mandatory. Link to your prototype, codebase or GitHub repository.

Supporting Documents

OPTIONAL

Additional links or documents where applicable to strengthen your submission.

Scan here to submit

UNIVERSITY HACKATHON 2026

What Should Your Pitch Deck Cover?

The slides should cover 8 key areas:

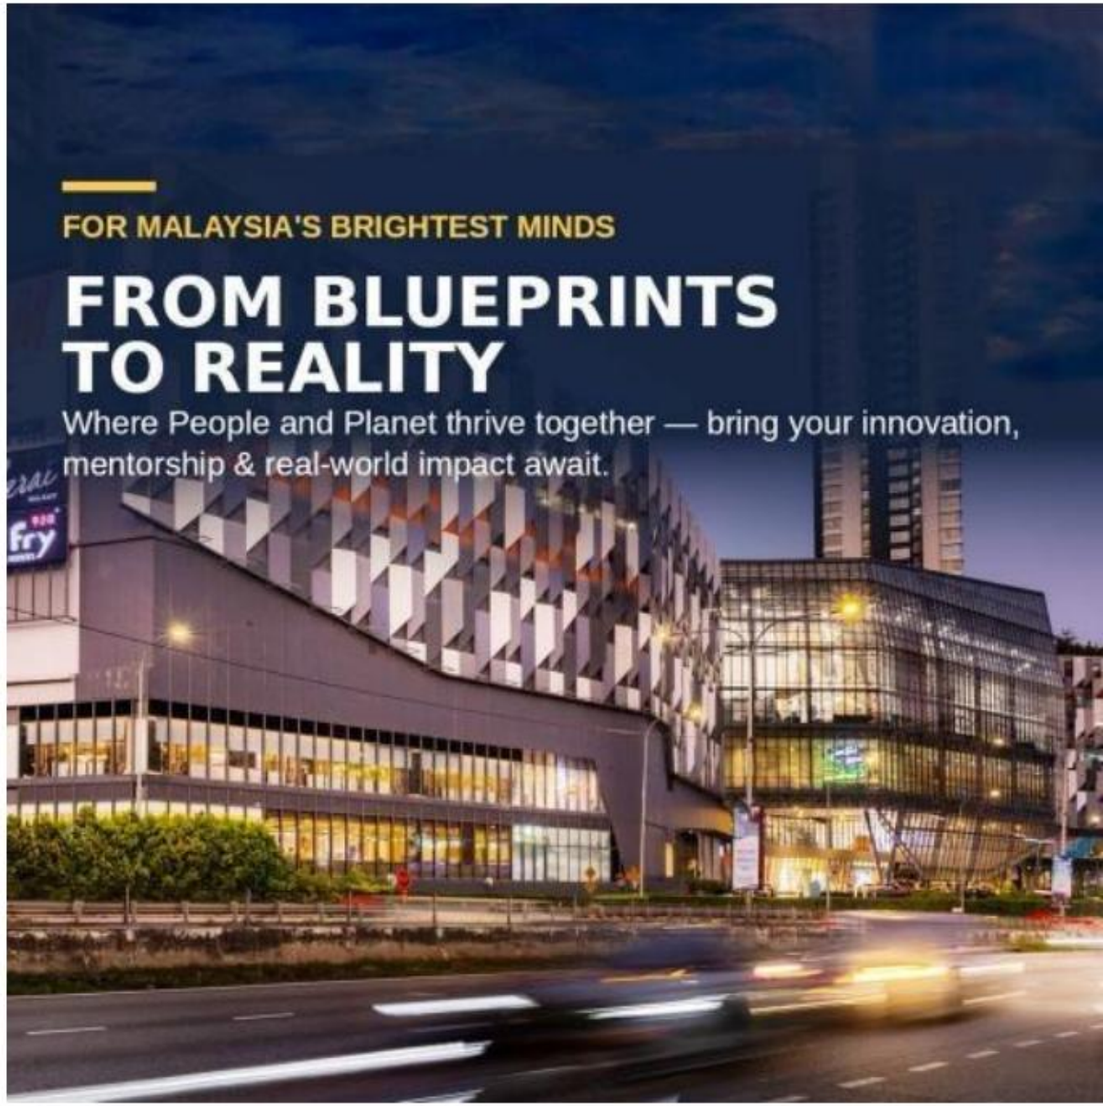

The Story

1. Problem
2. Target User
3. Solution
4. Innovation

The Proof

5. How it Works
6. Impact
7. Feasibility
8. Implementation

> *Keep your core pitch deck to 10 slides and moving secondary details to the appendix.*

UNIVERSITY HACKATHON 2026

Example: Pitch Deck Walkthrough

SCENARIO: Finding parking at a mall

Shoppers circle crowded parking levels looking for a vacant bay, wasting time and adding stress to their visit.

The Story

1 Problem

Shoppers circle full parking levels at peak hours hunting for a bay, wasting time and adding stress.

2 Target User

Weekend and peak-hour mall visitors, especially families, plus mall operators managing car park traffic.

3 Solution

A mobile app and LED signs that show live vacant bays per level and guide drivers straight to a free spot.

4 Innovation

AI on existing CCTV detects free bays in real time, with no costly sensor per bay, and predicts availability.

The Proof

5 How it Works

Camera detects bay status → data sent to cloud → app and signs update live → driver follows guided route.

6 Impact

Less time circling, shorter ramp queues, lower fuel use and emissions, and a better shopping experience.

7 Feasibility

Uses proven tech and existing cameras; low setup cost; revenue from operator subscription or bay pre-booking.

8 Implementation

Pilot one car park level for 3 months, measure search time saved, then roll out mall-wide and to other malls.

Tip: Carry one clear problem through every slide. Keep your core pitch deck to 10 slides and move secondary details to the appendix.

UNIVERSITY HACKATHON 2026

Judges Criteria

Each criterion has a specific question judges will ask when evaluating your submission. Understand what they are looking for and build your solution accordingly.

25%

Impact & Sustainability Value

Can the solution create meaningful and measurable resident, community or environmental outcomes?

20%

Innovation & Differentiation

Is there genuine originality or a differentiated approach rather than simply repackaging an existing solution?

20%

Feasibility & Deliverability

Could the solution realistically be piloted and implemented within a township environment?

15%

Strategic Fit & Theme Relevance

Does the idea clearly address a People or Planet challenge and an SDP township priority?

10%

Commercial & Value Multiplication

Could the solution create value for SDP, township businesses and/or residents and potentially scale?

10%

Team, Evidence & Pitch Quality

Has the team researched and validated the problem, developed a credible solution and communicated it clearly?

UNIVERSITY HACKATHON 2026

Top 10 — Ideas refined by Industry Subject Matter Expert

Selected teams will receive mentoring support from Industry Subject Matter Expert prior to pitching physically to Sime Darby Property.

With mentor guidance, the Top 10 will refine their solution, implementation approach, prototype/demo and pitch before presenting in person to Sime Darby Property's final judges.

UNIVERSITY HACKATHON 2026

Top 10 - Pitch & Talent Spotlight

14 NOVEMBER 2026 | Sime Darby Property Office | 9:30 A.M. – 5:00 P.M.

Physical attendance is compulsory for all selected finalists.

Morning Session — Pitch Session
9.30 AM – 1.00 PM

Format & Participants

10 MIN
Pitch per team

5 MIN
Q&A per team

Judges: Leaders from relevant Sime Darby Property teams.

Teams: Top **10** finalist teams.

Afternoon Session — Talent Spotlight
2.30 PM – 5.30 PM

Every individual finalist will be given **5-10 minutes** to introduce themselves to Sime Darby Property. This session gives SDP an opportunity to identify students for potential internship and future talent opportunities.

5-10 Minutes Session

Career introduction per individual finalist.

What to Cover in Your 5-10 Minutes

- Who are you beyond your resume?
- What is the one trait that defines you the most?
- What makes you different from others?
- What's your passion?
- What did you contribute to your team's solution?
- What achievement or experience are you most proud of?

UNIVERSITY HACKATHON 2026

Final Presentation & Award Ceremony

Event Details

3 DECEMBER 2026

ELMINA, SIME DARBY PROPERTY

ALL TOP 10 FINALIST TEAMS ATTEND

Physical attendance is compulsory for all Top 10 finalist teams on 3 December 2026.

TOP 5 PRESENT

The Top 5 teams present their solutions to an audience. Presentation format and duration to be confirmed.

TOP 10 SHOWCASE

All Top 10 finalist teams will be provided with a showcase booth. More details and setup requirements will be shared later.

WINNER ANNOUNCEMENT

Final ranking will be revealed and certificates & prizes presented at the event to all Top 10 teams.

Final ranking will NOT be revealed on 17 November.

Champion, 1st Runner-Up and 2nd Runner-Up will only be announced at the Final Presentation & Award Ceremony on **3 December 2026.**

Champion

Ranking hidden until Final Presentation & Award Ceremony.

1st Runner-Up

Ranking hidden until Final Presentation & Award Ceremony.

2nd Runner-Up

Ranking hidden until Final Presentation & Award Ceremony.

UNIVERSITY HACKATHON 2026

Prize Structure & Winner Pathway

Designed to attract quality participation and stay aligned with market benchmarks. With a career pathway beyond the cash prize

PRIZE POOL | TOTAL RM14,000

CHAMPION	**RM6,000**
1ST RUNNER-UP	**RM3,000**
2ND RUNNER-UP	**RM1,500**
CONSOLATION 4th - 10th place	**RM500 each**

BEYOND THE PRIZE MONEY

Internship & MAP Programme

Intern Programme
10 selected winners join as interns and continue building their own submitted idea alongside SDP teams and mentors.

MAP Programme
High-potential winners enter the MAP track for structured development, mentoring and exposure across the business.

Merit-based and capped
Seats are awarded on merit by the judging panel with Judges from Sime Darby Property.

UNIVERSITY HACKATHON 2026

Journey to Build Your Idea, and more importantly - CAREER

From a hybrid hackathon into a continuous talent and innovation pipeline

01 | TALENT

Winners join SDP

Placement in SDP
Top-performing hackathon teams are offered a place in SDP.

Talent Pipeline
Converts competition performance into a direct, pre-qualified talent pipeline.

Real-world Opportunity
Winners get the opportunity to carry their own solution (guided by SDP subject matter expert) into the organisation.

02 | INTERNS

Interns build the ideas

Attached to Selected Ideas
Interns are attached to the selected ideas during their tenure.

Hands-on Involvement
Hands-on involvement keeps momentum after the event closes.

Real Project Exposure
Gives students real project exposure and mentoring.

03 | TEST & LEARN

Ideas test and learn

Ideas are assessed
The full pool of ideas is processed and assessed.

Proof of concept
A selected few go through the proof of concept process for execution.

Greater employee involvement
Delivery involves greater involvement of employees from various fields for participation.

HACKATHON > TALENT INTAKE > IDEA INCUBATION > COMPANY-WIDE EXECUTION

Terms of Hackathon

PDPA, T&C and IP Rights

DATA PROTECTION & CONSENT

Your data is protected.

By joining the challenge, you consent to the collection, processing and use of your personal data in accordance with the applicable data protection laws and our privacy policy.

- Used for registration, judging, communications and event management.
- Managed securely in line with applicable personal data protection requirements.
- We do not share your data with third parties except as required for the programme.

HOUSE RULES AND TERMS OF CONDUCT

Compete professionally.

All participants must agree to Sime Darby Property's Terms & Conditions and House Rules.

- Follow all competition guidelines and instructions.
- Respect fellow participants, mentors, organisers and partners.
- Avoid plagiarism and give proper credit to external sources.
- Uphold integrity and maintain professional behaviour at all stages.

IP & MEDIA RELEASE

Know your IP rights.

IMPORTANT

All submissions and solutions created during the hackathon become the intellectual property of the Organiser.

- The Organiser has full rights to use, reproduce, modify, showcase and commercialise all submitted materials.
- By participating, you consent to photography and media coverage for promotional and reporting purposes.

Participation in the Hackathon constitutes acceptance of applicable Terms & Conditions. House Rules, Privacy requirements and IP/media provisions

UNIVERSITY HACKATHON 2026

Selected Finalists Must Attend Physically

Two physical events are mandatory for all selected finalists.

Students are responsible for arranging and bearing all associated travel costs.

Mandatory Physical Events

01

14 November 2026

Pitch to Judges Day
Sime Darby Property HQ

02

3 December 2026

Top 5 Final Presentation & Award Ceremony
Physical Event

Student Responsibility — Travel Costs

Flights
Arranged and borne by the student.

Transportation
Arranged and borne by the student.

Accommodation
Arranged and borne by the student.

Meals & Personal Expenses
Where applicable, borne by the student.

Travel and accommodation costs are the responsibility of the student.

Sime Darby Property will not cover these costs.

UNIVERSITY HACKATHON 2026

Stay Connected

Participants will have access to a dedicated communication and support channel throughout the Hackathon programme.

Support Platform

Telegram Link

Details will be shared through official programme channels after submission.

What the Channel Covers

- Challenge questions and clarifications
- Submission questions and guidance
- Technical support
- Programme reminders and updates
- Clarifications and FAQs

UNIVERSITY HACKATHON 2026

YOUR NEXT MOVE

1 BUILD YOUR TEAM

3–5 students. Diverse skills make stronger solutions.

2 CHOOSE

PEOPLE or PLANET — pick the challenge area that drives you.

3 FIND

A real township problem worth solving. Observe. Research. Validate.

4 CREATE

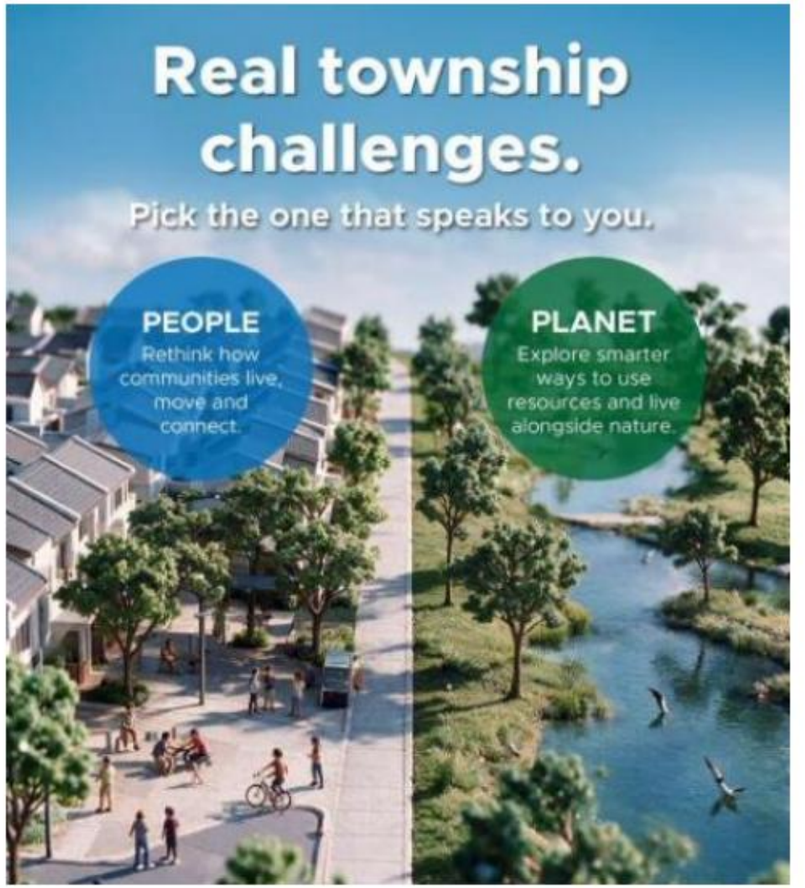

An innovative, evidence-based solution that is feasible and scalable.

5 BUILD

Your prototype or demo. Show that it works.

6 SUBMIT

By 23 October 2026. All four components. On time.

⚠ REGISTRATION CLOSES
